Molecular structure, Polymers, Binders, Electrical
properties.

The molecule of a plasticizer contains polar and non-
polar groups. The amount ratio of polar to non-polar
groups is decisive for the compatibility of the plasti-
cizer in PVC. The polar groups serve as binders.
Non-polar molecule components can be divided into
polarisable (aromatic) and non-polarisable (aliphatic),
whereby two opposite types of plasticizer can be dis-
(Materials--Plastics, TT, v. 10, no. 3) (over)
